

To force your Chromebook to update. Your version should be **86.0.4240.198 (November 12, 2020)**.

Please note: You may have to run "Check for updates" several times to get to the above version.

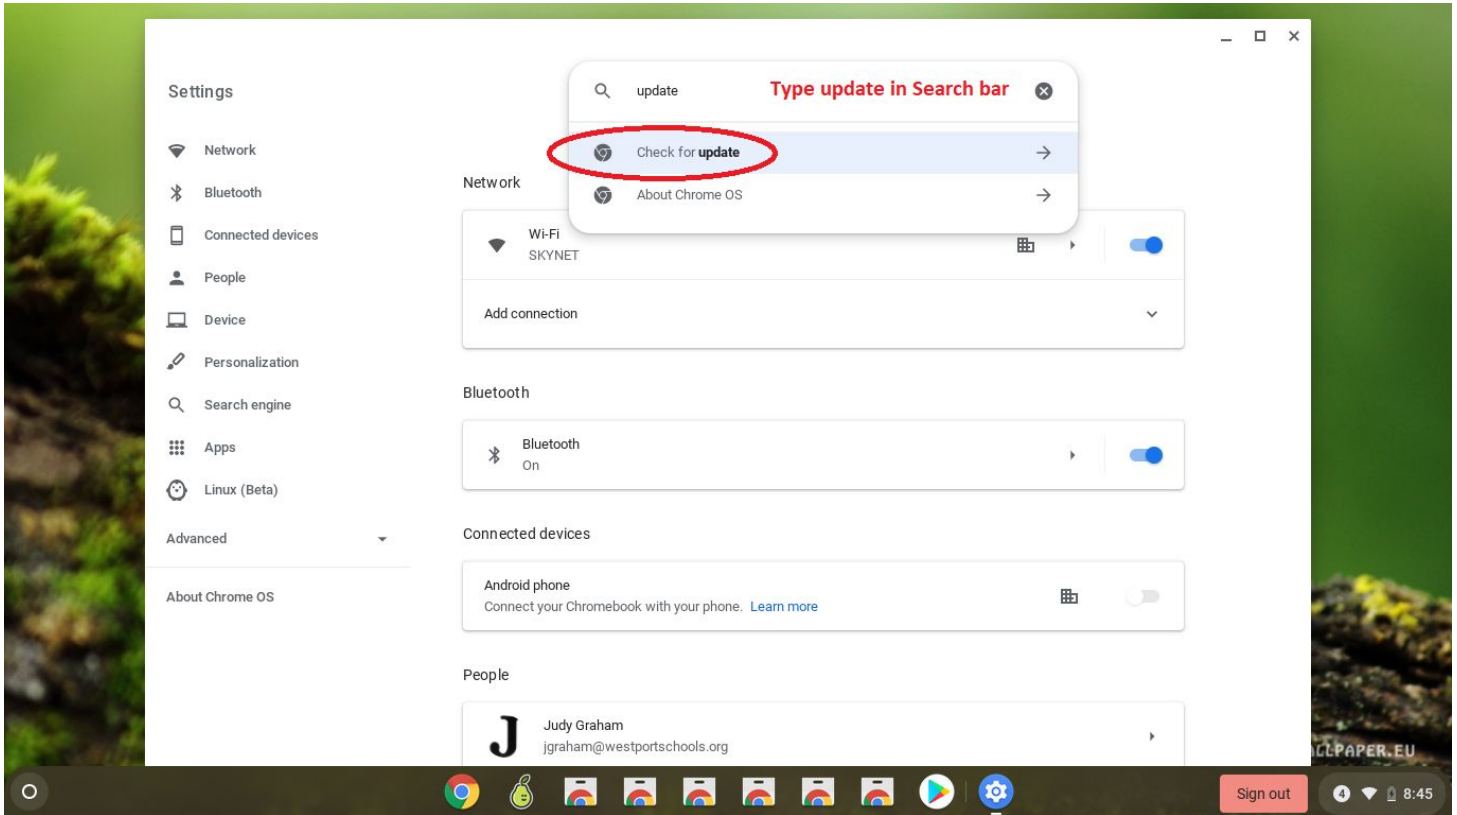

Step 1

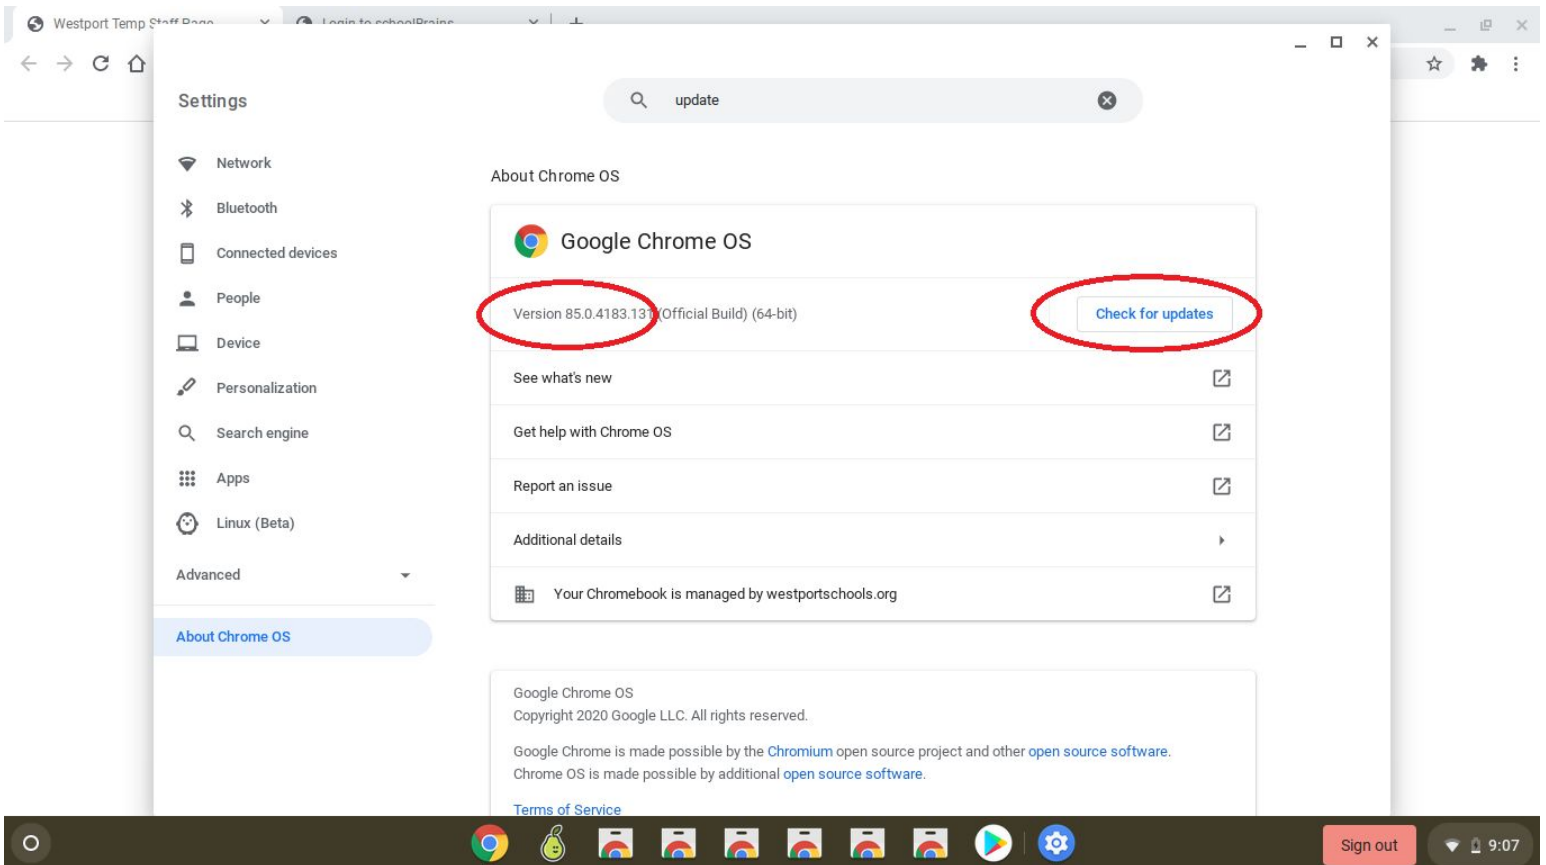

Step 2

Step 3

Step 4

Step 5

The image shows a Gmail inbox on a Chrome OS device. The selected email is an update notification from Google Chrome OS. The notification text reads: "Nearly up to date! Restart your device to finish updating. Version 85.0.4183.108 (Official Build) (64-bit)". A blue "Restart" button is located to the right of the notification and is circled in red. The Gmail interface includes a left sidebar with folders like "Inbox", "Starred", "Drafts", and "Meet". The top of the screen shows a search bar with the word "update" and a search icon. The bottom of the screen features a taskbar with various application icons and a "Sign out" button on the right.
